

Lab 14

Name: Shiva Kumar

Enrollment No: 92301733056

CO1: Develop fundamentals in fabrication of MOSFETs and MOS transistor

**CO2: Analyze MOS inverters with its static and switching characteristics CO3:
Analyze Combinational and Sequential MOS logic circuit**

**Experiment 14: To design 1 bit SRAM using CMOS and simulate the design
Circuit:**

Output Waveform:-

Conclusion

The 1-bit SRAM cell using CMOS was successfully designed and simulated. The circuit exhibited correct read, write, and hold operations with low power dissipation and stable data retention, demonstrating efficient memory cell behavior suitable for VLSI applications.
